

How to use DSL Rentals Service: Proxy DSL / Proxy 4G

- 1) In order to use this service through HTTP protocol you need to put a domain and port information in your browser network settings.

For Google Chrome browser:

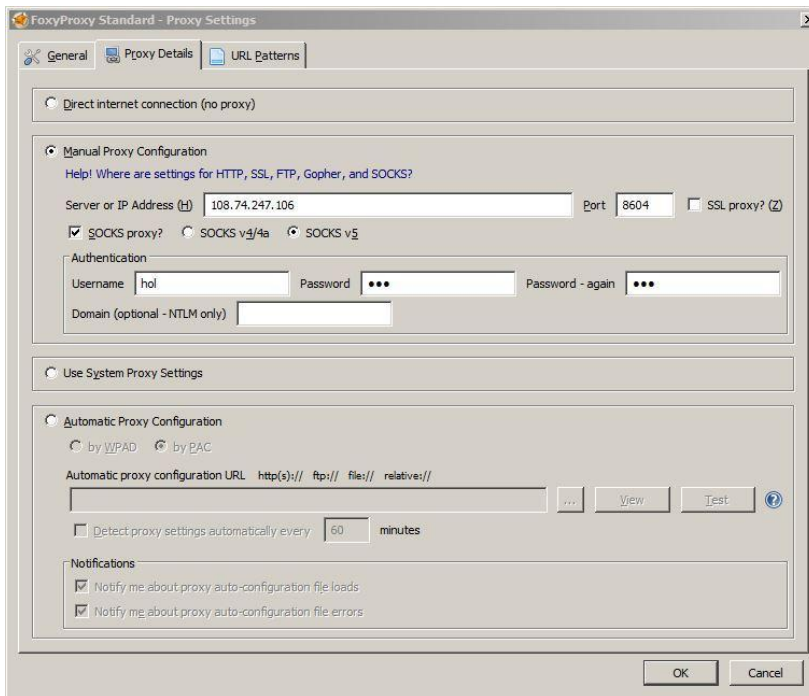

For Mozilla Firefox browser:

After that you will see an authentication window where you need to put your credentials.

In order to use this service through Socks5 protocol you need to install [FoxyProxy](#) add-on for your browser and put domain/port information and your credentials into the settings.

2) Using your control link you can track a status of your proxy connection and also you can change your IP and proxy type.

Your IP	Proxy health	Point of access	Domain	Proxy type	Control panel of 4G-NY2-15
75.250.13.75	good	47.17.181.119:8928	officeny2.dyndns.tv:8928	HTTP/HTTPS	Change IP Reboot

You can watch this video and see how our service works:

https://www.youtube.com/watch?v=4QLap_vvLyI

3) If you see in the control panel status "Proxy is OFF", please send "Change IP" command one time to re-connect.

Please note: *After 1 hour without IP changes modem automatically turns off. To turn it back on, just press "Change IP" button in control panel.*

All necessary information including control link, point of access (domain and port) and login/password you can find in our information email.

If you have any question or any issues with our services you can request help through My Account -> Support.
